

A medicine or drug is "any pill, powder, potion, salve, or other preparation intended by the manufacturer for human use and which purports on the label to have medicinal qualities." See 86 Ill. Adm. Code 130.310. (This is a GIL).

September 24, 1999

Dear Ms. Xxxxx:

This letter is in response to your letter dated August 25, 1999. The nature of your letter and the information you have provided require that we respond with a General Information Letter, which is designed to provide general information, is not a statement of Department policy and is not binding on the Department. See 2 Ill. Adm. Code 1200.120(b) and (c), enclosed.

In your letter, you have stated and made inquiry as follows:

We were questioning the taxability status of our new product PRODUCT. Enclosed you will find a fact sheet with a detailed description of our new product and its ingredients. We would greatly appreciate if you could render a ruling in writing as to whether our product is taxable or not in your state.

Thanking you in advance for your help and should you require any further information regarding this matter, please feel free to contact me at the above mentioned phone number.

In the context of a General Information Letter, we are unable to rule on the taxability of the product you described in your letter. For your information, we have enclosed a copy of 86 Ill. Adm. Code 130.310, which is the Department's regulation for "Food, Drugs, Medicines and Medical Appliances." This regulation describes how sale of food and drugs can be subject to either low (1%) or high (6.25%) State tax rates under the Retailers' Occupation Tax Act. Local sales taxes may also apply, depending upon where retail sales are made.

As you can see, the regulation provides that food which is to be consumed off the premises where it is sold (other than alcoholic beverages, soft drinks, and food which has been prepared for immediate consumption), and prescription and non-prescription medicines, drugs, and various medical appliances are taxed at the State rate of 1% plus applicable local taxes. Food is defined as any solid, liquid, powder or item intended by the seller primarily for human internal consumption, whether simple, compound or mixed, including foods such as condiments, spices, seasonings, vitamins, bottled water and ice. See Section 130.310(b)(1).

A medicine or drug is "any pill, powder, potion, salve, or other preparation intended by the manufacturer for human use and which purports on the label to have medicinal qualities." See 86 Ill. Adm. Code 130.310(c)(1). Products that do not meet the appropriate definitions of food, drugs, medicines or medical appliances, or are food prepared by the vendor for immediate consumption, are taxable at the higher State sales tax rate of 6.25% plus applicable local taxes. Whether the PRODUCT is a medicine or drug subject to the low rate of tax depends on how it is used and whether the label indicates that it has medicinal qualities.

I hope this information is helpful. The Department of Revenue maintains a Web site, which can be accessed at www.revenue.state.il.us. If you have further questions related to the Illinois sales tax laws, please contact the Department's Taxpayer Information Division at (217) 782-3336.

If you are not under audit and you wish to obtain a binding Private Letter Ruling regarding your factual situation, please submit all of the information set out in items 1 through 8 of the enclosed copy of Section 1200.110(b).

Very truly yours,

Melanie A. Jarvis
Associate Counsel
